

## Work Virtually Anywhere

### Windows Small Business Server 2003 gives your business greater reach

Windows Small Business Server 2003 makes it easy for you and your employees to work remotely—and stay connected to your business and customers. Whether you're off-site or telecommuting, you can access business information—e-mail, contacts, calendars, business applications, internal Web sites and your desktop—from any PC with Internet connectivity.

Access isn't limited to laptops. You can also access your business e-mail, contacts and calendar with a Windows Mobile™-based device.

You can stay in better touch with your customers. And your employees can rely on having the most up-to-date information, so they can work more productively wherever business takes them.

*"As a regional planning agency involved in issues statewide, our staff is often out of the office. Our new server gives us a secure means to access our system remotely, allowing access to our office resources while traveling—which increases our productivity while on the road."*

**Jay Trusty**  
Executive Director  
Southwest Regional  
Development Commission

For more information, we invite you to visit [www.microsoft.com/sbs](http://www.microsoft.com/sbs) or contact a Microsoft technology provider in your area.

*"By using the messaging and collaboration features in Microsoft Windows Small Business Server 2003 and the ease of remotely accessing e-mail and administrative functions, I can stay fully informed and make key business decisions as if I were back in the office."*

**Antonio Brites**  
EuroStar International Corporation

**"I want to access my business information and resources when I'm on the road or away from the office."**

With Microsoft® Windows® Small Business Server 2003, you can manage your business and stay connected with your customers—from virtually anywhere, and anytime.

### Stay productive while away from the office

How much of a difference would it make to your business if you could access information and resources from your desktop at work via any computer with an Internet connection?

For many business owners, Windows Small Business Server 2003 has brought huge payoffs in terms of productivity, customer responsiveness and more effective information management. They report achieving significant cost savings—along with net revenue gains—as a direct result.

### A line of communication that's versatile and protected—24/7

Windows Small Business Server 2003 gives your company enhanced communication tools to work remotely. You and your employees can work collaboratively from virtually anywhere, using any computer with Internet access.

And it's protected. Windows Small Business Server 2003 has security protocols that extend to keep your business information safeguarded. Your team gains a single, protected entry point to vital business information to keep business current in real time.

- **Check e-mail while on the road.**

Respond to e-mail, find contacts and view schedules via any computer or Windows Mobile-based device with Internet access.

- **Stay current with your company.** With a remote connection to your office, you can:

- Access company information and resources from any PC with Internet access
- Use line-of-business applications
- Collaborate with colleagues through your internal company Web site
- Manage documents and coordinate schedules

- **Access your office PC.** Get e-mail, files, schedules and any other information you typically access from your desktop—while you're on the road. Data is automatically synchronized so you don't have to worry about staying current with different versions.

### Mobile devices keep you connected

You can also use Windows Mobile-based devices to access your e-mail, contacts and calendars. Windows Mobile 2003 software integrates seamlessly with Windows Small Business Server 2003.

### It all adds up to greater business capacity

Windows Small Business Server 2003's mobility tools give your business more flexibility, resource depth—and range.

Client proposals aren't held up while your employees are hunting down critical information. While away from the office, you'll have access to all the facts you need, in real time. Your employees can share information, keep their calendars updated and your business informed while on the road.

*"It's hard to express the value and personal impact of having access to my network from home. I can flex my work schedule to meet the needs of my family. After six years of juggling schedules, I now have a very important piece of my family life back."*

**Jodi Wahlund**  
President, 2 Days Bath

*"Easy, 24-hour access to all our network resources, even down to desktop hard drives, gives us 10 percent to 15 percent more time to get things done. We can solve problems from home or the road, which ultimately means we can take care of our customers better."*

**Chuck Riddell**  
Information Technology Manager, OmniMount
